

Clinical research study for people with excess weight who also have heart disease or kidney disease, or both.

TRIUMPH-OUTCOMES

TRIUMPH-OUTCOMES is a clinical research study for people with excess weight who also have heart disease or kidney disease, or both.

The study will test if the investigational medicine (a medicine being studied) may help reduce the risk for heart disease and kidney disease in people with excess weight.

Can I join this study?

Yes, you may be able to join the research study if you:

- Are aged 45 years or older
- Have heart disease
- Have kidney disease
- Have type 2 diabetes or not, and your HbA1c levels are less than 10 percent
- Have a BMI of 27 kg/m² or more

BMI stands for **body mass index**. It is a number that compares a person’s weight to their height. It can be used to tell if a person may be at risk of some health conditions.
