

WHAT'S MISSING FROM YOUR TYPE 2 DIABETES MANAGEMENT?

Finding a type 2 diabetes treatment option that's just right for your life can be difficult. A clinical research study is underway for adults who have been diagnosed with type 2 diabetes in the past 4 years that is not fully controlled by diet, exercise, and metformin.

You may be able to participate in the **SURPASS-EARLY Study** if you:

- Are 18 years of age or older
- Have been diagnosed with type 2 diabetes within the last 4 years
- Have been on metformin
- Have a body mass index (BMI) between 25 and 45

If you are interested in participating, the study doctor or staff will review additional criteria with you. Qualified participants will receive study-related care at no cost.
